INTER-HOUSE CLUB COMPETITIONS

Date	Club	Class	Activities
20th August 2022	Maths Club	6th & 7th	Rounding Receipts Step 1: Save all receipts at least from your 5 shopping trips Step 2: Round each item's price to the nearest Rs 10, Rs50, Rs 100, and Rs 1000 Step 3: Calculate the total using each method. Compare.
		8th	A trip to the supermarket or grocery store is usually a weekly and sometimes even daily event. This will bring the students along and keep them occupied with grocery store math activities that not only allow them to be involved with shopping for their family but also incorporate mathematics skills. "Cost of Meals" Step 1 : If you're planning a meal or even multiple meals, plan out the menu with your family before going to the store. Step 2 : Make a list of items you will need and the quantity of each item. Step 3 : While collecting the items at the grocery store, the child will write down the cost of each item. For produce, make sure to weigh the items and have them determine the price before going to the cashier. Note : Weighing items and determining the total cost can be an ongoing activity throughout the supermarket for loose items that are priced by weight. Step 4 : The Student will bring the receipt of all shopping done, to the school & will calculate the total cost of the meal and the cost per person in their family.
